

DAVID MANJARRES

Full Stack Developer — Java | Spring Boot | React | TypeScript

+593 979 273 738 • davidmanjarres2004@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and maintaining web applications across healthcare, business, and academic environments. Experienced with Java/Spring Boot, PHP/Laravel, Node.js/NestJS, React, TypeScript, relational databases, Docker, Redis, and Linux-based production support. Proven track record of optimizing backend performance (up to 85% response time reduction), implementing secure APIs, and delivering production-ready systems. Strong focus on clean architecture, security, maintainability, and practical problem solving in real operating environments.

TECHNICAL SKILLS

Backend: Java (8/11/17), Spring Boot, Spring Security, Spring Data JPA, Hibernate, PHP, Laravel, Node.js (NestJS, Express.js), FastAPI

Frontend: React, TypeScript, JavaScript (ES6+), Blade, Material UI, TailwindCSS, shadcn/ui, Bootstrap, HTML5/CSS3, Responsive Design

Databases: PostgreSQL, MySQL, MongoDB, Redis, ELT, Query Optimization, N+1 Prevention, Normalization (3NF)

Testing & DevOps: JUnit 5, Mockito, Playwright, Vitest, Jest, Jenkins, Docker, Azure Container Apps, Kubernetes, Linux/Debian

Security & Architecture: JWT, OAuth2, RBAC, Microservices, Clean Architecture, SOLID, OWASP Top 10

Tools: Git, Postman, SonarQube, Spring Actuator, Eureka Server, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer — SMARTMEDIC

Jan 2026 – May 2026

Developed, maintained, and supported healthcare systems for clinics, medical centers, and hospitals

- Maintained core healthcare modules and integrated subsystems using PHP, Laravel, Blade, MySQL, PostgreSQL, Git, and MVC architecture
- Built and supported connected services with Node.js, NestJS, Express, TypeScript, TypeORM, JWT authentication, and selected FastAPI modules
- Developed responsive interfaces, dashboards, forms, and validations using React, React with TypeScript, Material UI, Bootstrap, Chart.js, Zustand, and sockets
- Supported Linux/Debian servers through log review, basic performance monitoring, backups, Docker, Redis, queues, and operational troubleshooting
- Created technical and functional documentation in Markdown and demo videos to improve support, maintenance, and knowledge transfer

Freelance Full Stack Developer

Jan 2023 — Present

Designed and delivered full-stack web applications for small businesses and academic clients

- Architected and deployed 5+ production-ready full-stack applications using Spring Boot (backend) and React/TypeScript (frontend)
- Implemented comprehensive CI/CD pipelines with Jenkins and Docker, reducing deployment time by 60% and eliminating manual deployment errors
- Optimized PostgreSQL queries and introduced Redis caching strategies, achieving up to 85% reduction in API response times across multiple projects
- Designed and deployed microservices architectures on Azure Container Apps and Kubernetes, ensuring horizontal scalability and fault tolerance
- Achieved 85% code coverage through JUnit, Mockito, Jest, and Playwright automated testing suites

Projects

E-Commerce Marketplace Platform — Full Stack Developer

(Aug 2025 - Dec 2025)

Spring Boot, PostgreSQL, Redis, React, TypeScript, TailwindCSS, Jenkins, Azure Container Apps, Azure Blob Storage

- Engineered complete marketplace platform with Spring Boot RESTful backend and React/TypeScript SPA frontend
- Implemented JWT/RBAC security architecture with role-based permissions for buyers, sellers, and administrators
- Optimized backend performance using 3NF database normalization and N+1 query prevention, reducing query count by 70% and improving response times from 300ms to 45ms (85% improvement)

- Built responsive UI with React and TailwindCSS, implementing fast product search, filters, and shopping cart functionality
- Achieved 85% test coverage with JUnit, Mockito, Jest, and Playwright; automated deployments with Jenkins to Azure Container Apps
- Integrated Azure Blob Storage for scalable media management, handling 3,000+ product images

Medical Clinic Management System — *Full Stack Developer* (Aug 2024–Jan 2025)

Spring Boot, PostgreSQL, Redis, React, React Native, Resilience4j

- Architected secure healthcare management system using Clean Architecture with Spring Boot backend and React admin dashboard, managing 200+ patient records
- Implemented comprehensive backend services for appointments, medical records, prescriptions, and audit trails with rate limiting and cache invalidation strategies
- Optimized database performance through strategic indexing and normalization, reducing medical record retrieval times by 75%
- Developed cross-platform React Native mobile application (iOS/Android) with JWT authentication, push notifications, and appointment scheduling
- Applied security and privacy best practices with field-level encryption, role-based access control, and comprehensive audit logging
- Built resilient architecture with Resilience4j circuit breakers, retry mechanisms, and fallback strategies

Fuel Management System — **Microservices** — *Full Stack Developer* (2025, 5 months)

NestJS, Kubernetes, Docker, PostgreSQL, TypeORM, Eureka Server, React, TailwindCSS

- Designed scalable microservices architecture using NestJS with Eureka Server for service discovery and inter-service communication
- Deployed and orchestrated 6+ microservices on Kubernetes with auto-scaling and health checks
- Developed REST APIs for fuel tracking, consumption analysis, cost forecasting, and geolocation-based reporting
- Built an administrative dashboard providing useful metrics and cost analysis for decision-making
- Implemented event-driven communication between services for asynchronous processing and improved system resilience

PetSafe — **Veterinary Clinic Management** — *Full Stack Developer* (Mar 2026–May 2026)

NestJS, Angular, TypeScript, PostgreSQL, WebSockets, Docker, CI/CD

- Implemented full-stack modules for appointments, pets, owners, adoptions, configuration, and an operational metrics dashboard
- Built a real-time service queue with **WebSockets**, **JWT** authentication, and API documentation with **OpenAPI/Scalar**
- Automated system tests with **Playwright** and deployed to VPS with **Docker**, **Nginx**, Certbot, and **Cloudflare**

Iron Zone — **Gym Management on Odoo** — *Academic ERP Project* (Apr 2026–Jun 2026)

Odoo 18, Python, PostgreSQL, Docker, XML, Nginx, Certbot

- Developed custom modules and integrated admin views and business rules in **Odoo 18** using **Python** and **XML**
- Configured roles, permissions, and access control per profile; applied least-privilege principle in production environment
- Automated CI/CD with **GitHub Actions** and orchestrated deployment with **Docker** and **Nginx**

EDUCATION & CERTIFICATIONS

B.S. in Software Engineering — Universidad Técnica de Ambato, Ecuador

Certifications: Full Stack Web Development, Database Optimization & Performance, Docker & Kubernetes, Modern API Development with Spring Boot & React, Security Best Practices & OWASP
